Thanks for your letter regarding your fence collapse which was discussed at the club's management committee meeting on February 26.

Our initial investigations suggest the following:

1. Our boundary fence at the time we leased the land at the bottom field was a 4ft wooden post and wire structure.
2. A previous owner of your property chose to enhance the property by installing a 6ft wooden fence.
3. The club did not have any input to the design and construction of that fence.
4. The club has never agreed to any share of maintenance cost for that fence
5. In addition, it is unclear at this moment whether the fence constructed round your property borders on the land leased by the club, or whether there is a strip of land between our initial border fence and the fence around your property.

In light of these circumstances, it is difficult to see what assistance the club can offer in regard to the repair of your property's fence. However, if you think it would be useful, I would be happy to have an informal meeting with yourself to discuss the situation.

Yours Sincerely

Frank Mulligan

President etc
