1xv . Aerated and 100t of sand spread.

10 bags of seed and 10 bags of fertiliser also spread. Pitch now in good condition and needs to be cut to playable level. Which will be done before 18th August. For first club game. And lined.

2xv. Aerated and 10 bags of fertiliser and 10 bags seed spread. Has come up well and has been cut and lined to accommodate recent Rugby League games. Australian rules games and fun night.

Training pitch as per 2xv. However we require to apply a flat head weed killer to kill off significant weed spread. This is also required elsewhere. Cost is circa £400.

Triangle. Has now been maintained regularly and has a dedicated 40x45 mtr pitch marked out also with other training lines.

New fence installed at top of Triangle along with 2 swing gates as per request from junior section to try and stop dedication from dogs on this area. Signage I believe required to ask our local residents to keep off.

Bottom field. This area has been well maintained now and I believe this area is the place we should be directing our local dog walkers to use as it is dog friendly and no longer a health issue.

Trees coming on well.

Fence for 2xv . I have managed to secure a price of £400 for 110 posts and a mechanical post installer.

General areas. Grass at entrance all cut.

Ground force day need to assist on clearing paths. Car park and strimming at fence at roadside. Shrubbery also needs to be cut back slightly.

Updates from last report.

Still need leaf blower. Still need lining machine or repair of. Chainsaw fixed. Flymo. fixed but still not much use.

Strimmer still needs fixed.

Carpark. Network Rail now in attendance to fix fence. Works should be complete by 2 week of August.

Bushes all cut back by farmer but still needs ground force day to finish off.

Telephone mast will be getting worked on over next 2 to 3 weeks but will have no impact on car park.

Flagpole still to be sourced and erected. £40 on amazon if funds available.
